Product Overview

Production

Inspired by “entablatures” series by Roy Lichtenstein, the project is articulated through different levels of signs, materials and colours where the washbasin stars as central element of the bathroom.

The architectural approach of the designers involves the entire spatial dimension of the bathroom: the position of the sink is defined by a central band, available in different materials and colours, creating space to install mirrors, shelves, furniture and towel hooks.

# MARCANTE-TESTA

Since 2014 Andrea Marcante and Adelaide Testa have created a new design reality, Marcante-Testa. A studio oriented on architecture and design, as well as on business consulting for materials and furnishings. The atmospheres proposed by Marcante-Testa aim at elegantly remake the multiple values

of living. Being serious and fun, authentic and refined, having deep roots and loving the world: in this way the duo combines independent lines according with strict rules in the composition.

*"If certain interiors excite us, it is because they are examples of a possible choice between conflicting aspects of our character, of the legitimate aspiration to transform our worrying contradictions into something beautiful."*

Marcante-Testa

A collection of washbasins, cabinets and mirrors featuring geometric and sinuous lines, born from a balance of basic and classic shapes such as circles, semi-circles and parallelepipeds, creating a game of volumes in a succession of full and empty spaces. Freely inspired by early twentieth century Art Déco, the collection takes refined suggestions from that era and reworks them with the taste and sensitivity of a contemporary perspective.

# BERNHARDT & VELLA

Bernhardt-Vella was founded in 2008 by the German designer Ellen Bernhardt and the Italian interior designer Paola Vella. The firm is based in Milan. Their starting point is research as a maieutic process, they take cues that can

come from the art world, from the masters of the past as well as from architecture, and from this starting point they create their style, a recognizable style, but always personal.

*"We've translated a serene and discrete elegance into purity, balance of lines and shapes, lightness and airiness. Probably our more feminine side turning into a sweet, soft, but also contemporary and pragmatic sign."*

Bernhardt&Vella

Iconic collection inspired by the Modernist style of 1920s and 1930s interiors, Stand design features the original spirit of Nordic design. Geometric purity, simple naturalness and sober authenticity coexist in a perfect balance between functionality and aesthetic, giving life to objects that are sculptural and elegant yet light and airy at the same time.

# NORM ARCHITECTS

Norm Architects was founded in 2008. Based in the heart of Copenhagen, Norm works with residential architecture, commercial interiors, industrial design, photography, graphics and art direction. The name Norm indicates the importance of drawing inspiration from traditions and norms that have been refined for centuries within the field of architecture and aesthetics. Norm uses this concept as a virtue to focus on quality, durability and timelessness. They want their designs to not only be of good materials and good

craftsmanship, but to embody beauty, history and, most importantly, outlive fleeting trends. In spirit of Scandinavian simplicity Norm strives to cut to the bone in their designs. Finding the simplest shape for a given task without forgetting beauty and details, Norm Architects aim to reach a point where there is nothing to add and nothing to take away that can make the product better. Like true Scandinavians they pride themselves in their culture and history, aspiring to create new norms for Nordic design.

*"Each project is imbued with the same quality: simplicity that carries bigger ideas. Our projects explore ideas that not only look good but that also feel good: minimalism acquires softness and visual matter assumes haptic qualities. Our work is sharp and crisp and exudes, tacitly, our focus on quality, details and durability."*
